The Importance of Taking HR Notes

Grievance and disciplinary meetings can be challenging and time-consuming. They require accurate notes for efficient case management and any possible disciplinary action that may ensue. Taking your own notes whilst chairing a meeting can be difficult and distracting. Sometimes the task is given to people who have no specific skills for producing written contemporaneous records. As employees get more and more litigious, it is of great benefit to many companies to obtain a swiftly produced (within 24 hours if required) official record transcript that is produced by a professional, independent, expert transcript provider.
